---

## Summary

Computer Science student (UFMG) with a technical background in Informatics (UFV). I have practical experience in software development with C++, Python, JavaScript (HTML/CSS) and MySQL databases. Seeking to apply my technical knowledge to contribute to relevant projects and develop myself as a software engineer.

---

## Education

- Bachelor's Degree in Computer Science  
Federal University of Minas Gerais (UFMG) – Belo Horizonte, Minas Gerais
    - Degree in progress, with completion expected in 2028/2.
  - Technical Degree in Informatics Integrated with High School  
Federal University of Viçosa (UFV) – Florestal, Minas Gerais | Completion: 2022/2
    - Emphasis in software development, databases, and technical support.
- 

## Projects

- C++ Platform Game
    - Development of a platform game using the Allegro C++ library. The project was developed in a group for the final assignment of the Programming and Software Development 2 course (UFMG).
    - Repository: [github.com/mttcabral/pds2-final-project](https://github.com/mttcabral/pds2-final-project)
  - Financial Data Collection with Python
    - Development of a Bot to collect IFIX index data as part of the Junior Scientific Initiation Scholarship. Python, Selenium, and Pandas were used to perform data collection, or Web Scraping, treatment, and analysis, resulting in the calculation of the fund's dividend yield.
    - Repository: [github.com/mttcabral/fii-data-collector](https://github.com/mttcabral/fii-data-collector)
- 

## Skills

- Programming languages: C++ | C | JavaScript | Python | Java
  - Web Development: HTML | CSS
  - Databases: MySQL | SQLite
  - Operating systems: Linux | Unix
  - Version control: Git | GitHub
  - Agile Methodologies: Scrum | Kanban
  - Productivity tools: Microsoft Office | Google Workspace | Trello | Figma
- 

## Languages

- Portuguese
  - Native
- English
  - Bilingual proficiency
